An egg wash is beaten eggs, sometimes mixed with another liquid such as water or milk, which is sometimes brushed onto the surface of a pastry before baking. Egg washes are also used as a step in the process of breading foods, providing a substrate for the breading to stick to. Egg washes can also be used on calzones or on fish.

Coordinated Universal Time or UTC is the primary time standard by which the world regulates clocks and time. It is within about 1 second of mean solar time at 0° longitude (at the IERS Reference Meridian as the currently used prime meridian) such as UT1 and is not adjusted for daylight saving time.

It is effectively a successor to Greenwich Mean Time (GMT).
